- **WordPress:** Elementor, Tutor LMS and other plugins
- **Networking, IoT and tools:** Cisco CCNA, Arduino, Git, GitHub, Microsoft Office

SOFT SKILLS

Teamwork | Leadership | Communication | Problem solving | Fast learner

PROJECTS

Murimi Intelligent Hub (on GitHub)

- Built a Django platform connecting farmers, landowners, investors and drivers, with a 21-endpoint API, document verification and WhatsApp phone verification; 40 automated tests.

Chats & Sons Website | chataika.web.app

- Designed and deployed a live website for a carpentry business, with a product catalogue, WhatsApp ordering and my own product photography.

IoT Smart Vehicle Access Control System

- Designed and built an automated vehicle access control system using Arduino, sensors and hardware integration.

Murimi Farm ERP | promota.pythonanywhere.com

- Built a farm management system in Django with inventory, payroll (PAYE, NSSA), VAT invoicing and multi-currency reports, plus an offline Android app.

Murimi Marketplace (on GitHub)

- Built a Django marketplace where farmers list produce and buyers make offers, with a fair-price meter, buyer requests, ratings and safe order handling; covered by 122 automated tests.

EXPERIENCE

Community Service Representative, Raqual Junior School, Budiriro | 2024 to 2025

- Delivered technical support and administrative assistance to school staff.

IT Support, Family and Church Business | Look after their computers and digital tools.
