PROFESSIONAL SUMMARY

Results-driven Computer Science Student at the University of Zimbabwe with a unique blend of software development, network engineering, and business management experience. Proven track record of applying machine learning, Java, and Python programming to solve industrial problems, including developing custom inventory systems for the construction sector. Seeking an attachment where I can contribute technical rigor and a proactive problem-solving mindset.

CORE COMPETENCIES

- Programming & AI: Java, Machine Learning (Decision Trees, Algorithm Optimization), Python.
- Networking: Cisco Packet Tracer, Network Design, Troubleshooting.
- Technical Design: Precision measurement, materials calculation, and 3D visualization.
- Software Tools: Professional Photo Enhancement, Inventory Management Systems.
- Soft Skills: Analytical Psychology Application, Professional Reporting, Project Management.

PROJECTS

1.Chats and Sons Carpentry and Joinery | 2025 – Present

- Designed and deployed a custom mobile inventory application to streamline product tracking and business operations.
- Managed large-scale cabinetry projects, performing complex surface area calculations and material procurement for units exceeding 50 square meters.
- Enhanced brand presence through professional-grade product photography and digital image editing.

2.Business Development Duke Laundry (Startup Proposal) | 2025 – Present

3.IOT Smart Vehicle Access Control System

CERTIFICATIONS & LICENSES

- CS50's Introduction to Artificial Intelligence with Python – Harvard University (EdX)
- Microsoft Skillsbox Certification – Microsoft
- Class 2 Driver's License – 2022

COMMUNITY SERVICE REPRESENTATIVE

Delivered technical support and administrative assistance at Raqual Junior school, earning high marks in official University of Zimbabwe evaluations for professionalism and report accuracy.

EDUCATION

BSc Hons in Computer Science

ZIMSEC ADVANCED LEVEL

University of Zimbabwe | 2024 – Present

ZIMSEC ORDINARY LEVEL

SKILLS

- Python Programming
- IOT Technology
- Software development
- Machine Learning
- Network Engineering
- Problem-Solving

LEADERSHIP & INTERESTS

Interests: Exploring the intersection of human behavior and AI (Jungian psychology applications in tech).

Languages: English, Shona.

Leadership: Highschool senior Prefect
